

We are

X DreamCode

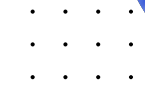

We believe in the development of technology and digital transformation as the future of business, the growth of companies and the world around us.

We work with agile methodologies aimed at achieving and transforming business challenges.

We are a private company that provides nearshore onshore software development services, we focus on providing commercial value through agile methodologies and state-of-the-art technology, we have the best qualified team of developers available in the market.

We have the experience:

We specialize in offering comprehensive and profitable services, we are an expert team in:

Cloud - Native applications development

Web applications front end development

Mobile applications development

Full Stack development

Microservices development

Software Architecture consultancy

Agile Methodology

DevOps

Technology solutions tailored to your needs

Staff Augmentation in software development

Optimize resources and boost your software project with a superior quality engineering team. We have highly qualified bilingual human talent under the outsourcing modality.

Development of web / mobile applications:

We create applications that increase the visibility of companies and their businesses, all our products are made under agile methodologies and with the leadership of an expert team in programming and development for the entire product life cycle.

Database tuning and administration services:

We provide strategic and tactical resources for companies that require a complement of support services, we are specialists in:
Architecture and design, migration, backup/recovery, monitoring and performance tuning.

Computer technology consulting:

We are managers and promoters of change and technological transformation of your company, we provide consulting services and personalized guidance in the integration of business technology tools. Find advice on the processes of:
Updating, backup and maintenance of your software products.

DreamCode Software Factory

Entire Teams or Staff Aumentation for:

Backend Software Development

Java, Kotlin,
Groovy,
TypeScript,
NodeJS,
PHP

On-premise,
Cloud-native,
Docker,
K8s

Microservices
oriented
development

GenAi,
LLM with python

Web and Mobile Development

TypeScript,
JavaScript, Dart,
Java (mobile),
PHP

Angular, React,
Ionic, Flutter

Microfrontends,
We, Hybrid mobile
Dev

Automated Test Development

TTD, BDD,
Selenium- based
UI test

JUnit, Jest,
Mockito,
Cucumber, K6,
Appium

Our clients

Our success stories

Our talent has the experience of working in different industries:

Banking, insurance, telecommunications, retail, technological services.

**square
trade**[®]
arity  **Allstate**[®]

SquareTrade - Arity (AllState)

SquareTrade: is one of the largest personal lines insurers in the US, providing extended warranty services to 140 million customers around the world. They work with many of the largest retailers and mobile operators on the market with protection plans for smartphones, appliances, televisions and furniture.

Arity: is a mobility data analysis company, focused on improving transportation. They collect and analyze enormous amounts of data through predictive analytics.

Arity's extensive data set provides unparalleled insights that can deliver effective and decisive business results for any auto insurer.

SquareTrade success story

SquareTrade is the global leader in mobile device insurance, providing extended warranty services to 140 million customers worldwide. DreamCode has agile teams for the development of the **SRE (SourceRoot Retirement) project**, which aims to generate an additional 20% annual revenue.

We integrate interdisciplinary engineering teams by combining software development with quality certification to migrate the architecture supporting SquareTrade's operations from its legacy system to integrated microservices, thus maintaining operations while completely decommissioning the monolithic legacy system.

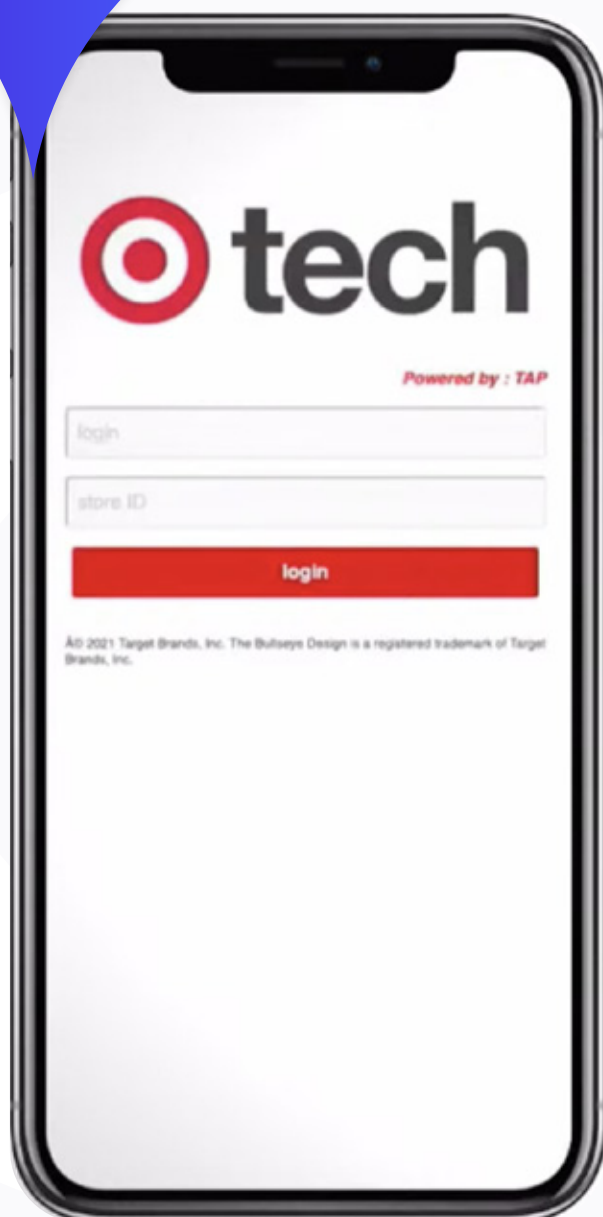

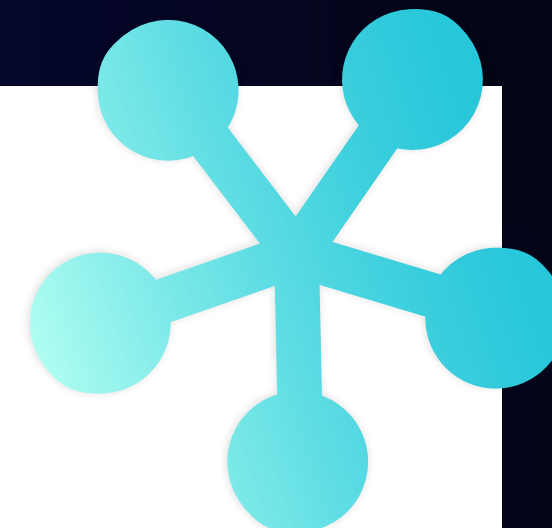

SquareTrade y DreamCode **transformando el futuro**

Target Corporation

It is the seventh largest retailer in the United States, having approximately **1,897 stores nationwide**. Target is dedicated to the retail sale of everyday items, food, fashion and discount products through its stores and digital channels.

Caso de éxito Target

Business dream: Connected Commerce Platform

A product present in + 1750 stores

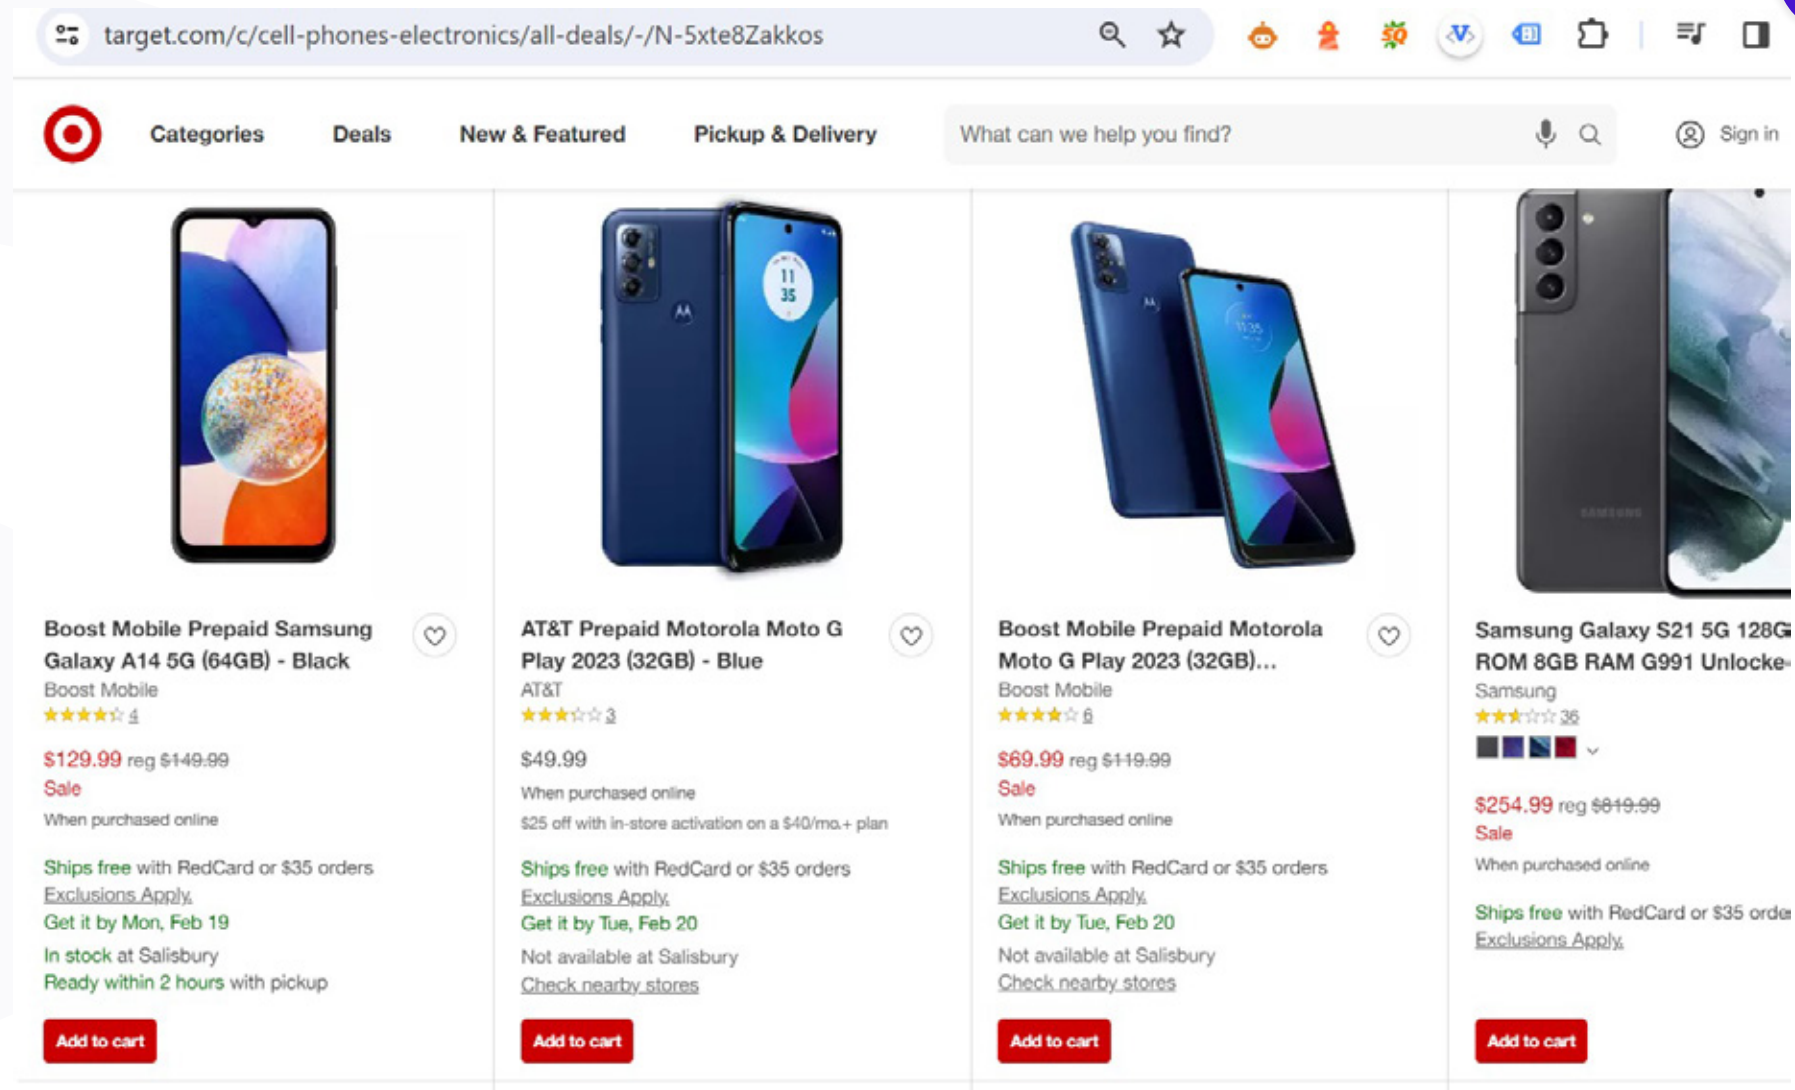

Backend development that supports the activation of different mobile services:

- New/addition of lines
- Updating plans or devices
- Device insurance
- Activation of Xbox services

verizon^v

XDreamCode

The centralization of products and services from different mobile telephone operators, through a single site. One of the modules of Target's technological infrastructure with the greatest stability of its system.

Seguros Bolívar

It is the second largest insurer in Colombia, they have a broad portfolio of insurance and policies for home, vehicles, health services, credit protection, among others. Seguros Bolívar is part of Grupo Bolívar, the third largest financial group in the country.

Seguros Bolívar success story

SmartCore - Rebuilding the Insurance Core

Seguros Bolívar's goal was to rebuild a core system with more than 25 years of evolution using modern software technologies and practices such as cloud computing, microservices, analytics, and design thinking, all focused on driving its digital transformation as one of the largest insurers in Colombia and advancing as a 100% digital market-leading company.

Caso de éxito Seguros Bolívar SuperApp Bolívar Conmigo

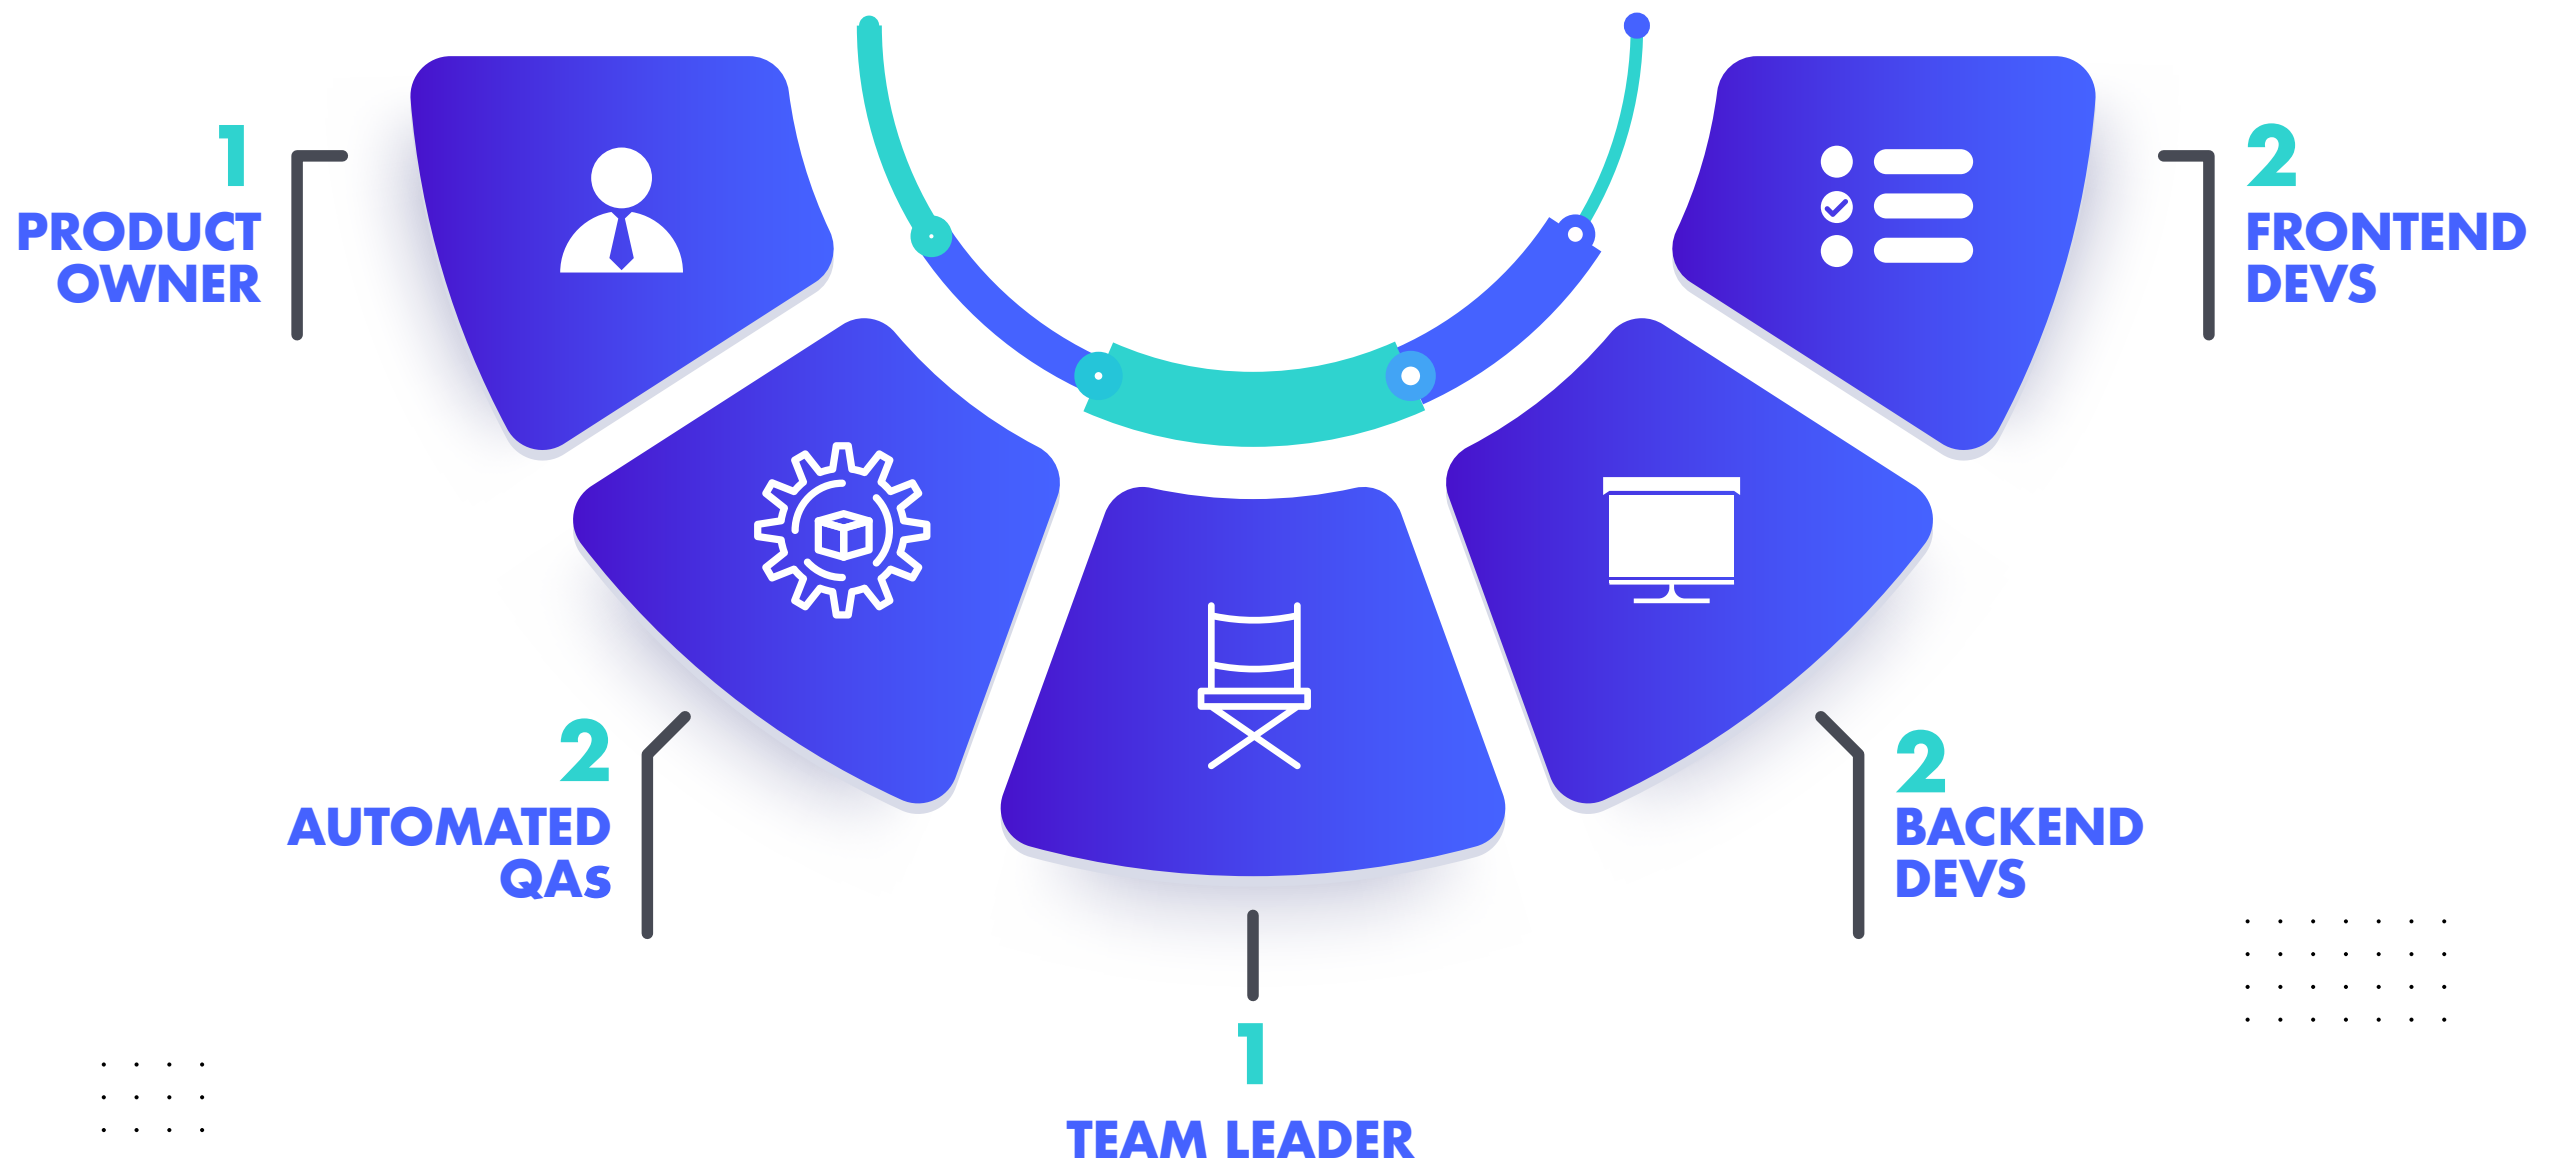

We developed an application that helps Seguros Bolívar customers and non-customers with emergency assistance for car travelers, health advice and monitoring, and home solutions, a digital platform that centralizes services based on new cloud-oriented architectures and integration with Seguros Bolívar's legacy on-premise system. This entire project was carried out through a team of experts in user experience design and digital products in software development.
